Sleep Patterns in Young Children with Social Communication Differences
### Study Participation

- Are you interested in learning about how your child sleeps?
- Are you interested in participating in a research study?

### About the study

This study is being done to learn about child and family characteristics as they relate to sleep habits and patterns.

As part of the study, your child will receive a diagnostic evaluation. You will be asked to complete questionnaires and have your child video-recorded. You will receive a summary of our findings and recommendations to improve your child’s sleep.

Families will be compensated for their time.

### Eligibility

We are looking for families in the Gainesville area to participate in our study.

To be eligible to participate:

- Your child must be between 2 and 6 years of age
- Your child must have a diagnosis of an Autism Spectrum Disorder

### Principal Investigator

Cynthia Johnson, Ph.D., BCBA-D
